Global Voices: The Twilight of Human Rights Law

Time: 6:00 – 7:30pm
Location: International House, Assembly Hall
Address: 1414 East 59th Street, Chicago, IL 60637
Special Note: Limit of 20 students

What is the future of human rights law? Is it bright or bleak? While countries around the world affirm their commitment to human rights with international treaties and conventions, flagrant violations of human rights continue. Well-known violators like Libya, Saudi Arabia, and Sudan have sat on the U.N. Council on Human Rights, while Brazil pursues extrajudicial killings, South Africa employs violence against protestors, and the United States tortures. In *The Twilight of Human Rights Law*, legal scholar Eric A. Posner argues that the reason for this failure is due to the contradiction between the goal of enforcing human rights—which requires simple rules—and the reality of governance, which requires flexibility and discretion.

Join us for this talk, where Posner will discuss the complexities of human rights law. Namely, he argues that fundamental disagreements about how governments allocate limited resources to advance the public good have led to a huge number of vague human rights regulations and weak enforcement machinery that cannot keep these rules in place.
